

SNIPER TEAM TRAINING SIMULATOR

SNIPER TEAM TRAINING SIMULATOR

Sniper Simulator, which can enable snipers to gain realistic training scenarios, shooting and binocular experience in a safe environment. Sniper Simulator: allows users to receive training in a repeatable and safe environment in a short time. It is also a cost-effective solution that increases the level of planning and mission preparation.

Sniper training simulator system provides complete system for 2 men team trainings. Simulator system includes replica interactive equipment such as; sniper weapon, sniper scope, observer binocular and visualization system. Replica sniper weapon have hi-fidelity hardware structure and integrated recoil mechanism. Sniper scope replica have adjustable and interactive lens control switches which directly effect on screens. Observer scope and sniper system works together in same simulated environment synchronously.

Main Features

- Train Sniper/Spotter teams in a controlled and cost-effective environment whilst gradually increasing scenario complexity
- Supports the use of the actual military issue sniper rifles, thus offering trainees the same muscle memory reactions and trigger pull fine motor skills with no requirement to remove the original scope.
- Trainees can be immersed in a wide range of scenarios that are normally impractical to simulate due to cost or manpower. Scenarios can range from covert recon and pattern of life observation to force multiplier, highly aggressive environments.
- Supports the spotter role with high fidelity binocular for target identification and 'fall of shot' adjustments to the shooter.
- Simulation system works with real weapon ballistic information in simulated area.
- Simulator includes 3D scenarios and virtual environment which also simulates weather conditions, long range polygons, Olympic and military targets, night vision.
